Chapter 1

Introduction

The EDA Report provides exploratory data analysis information on objects that inherit `data.frame` and `data.frame`.

1.1 Information of Dataset

The dataset that generated the EDA Report is an 'data.frame' object. It consists of 28,534 observations and 21 variables.

1.2 Information of Variables

Table 1.1: Information of Variables

The target variable of the data is 'NULL', and the data type of the variable is NULL(You did not specify a

target variable).

1.3 About EDA Report

EDA reports provide information and visualization results that support the EDA process. In particular, it provides a variety of information to understand the relationship between the target variable and the rest of the variables of interest.

Chapter 2

Univariate Analysis

2.1 Descriptive Statistics

```
Error in proxy[i, ..., drop = FALSE]: incorrect number of dimensions
Error in Hmisc::latex(x, file = ""): object 'x' not found
```
